## Easy to Assemble and Transport

### Perfect for Travel, Respite & Overnights with Family

### Makes Bedrooms Homely and Not Institutional

### Calms & Relaxes Children

### Machine Washable

Heather Grey

Sail Blue

Hot Pink

Royal Purple

#### FRAME PADS:

A layer of dense foam cushions the metal frame to protect against injuries from seizures or self-harming behaviors. Frame pads and Enclosure zip on and off for easy removal.

#### COVERLET SHEETS

Coverlet sheets replace the need for a fitted sheet. They're secured with a zipper to protect against entrapment zones while preventing removal. Zip off easy to launder like any other sheet.

#### ACCESS POINTS

Four metal grommets (1 1/8 inch) provide access points on both sides for feeding tubes, oxygen tubing, pulse-ox sensors, etc.

#### AIR MATTRESS

All beds come complete to sleep, with an Intex 10-inch air mattress and internal electric pump for travel.

#### REFLECTIVE PULL-TAB VELCRO SECURING SYSTEM:

Easily open and secure the bed from the outside. Zippers can't be accessed and unzipped from within.

#### STABILIZING STRAPS:

Straps anchor the Safety Sleeper to a traditional bed frame to prevent tipping and moving. Recommended for rambunctious older children and adults.

#### WHEELED SUITCASE:

The Safety Sleeper folds perfectly into a hard-shell, wheeled suitcase. Except for queen-size, all models and sizes weigh less than 50 pounds.

#### VIDEO MONITOR WINDOW:

Optional installation in vinyl or mesh for video viewing.
